

## Trivia Cards

Challenge students to create “trivia” cards for their Kingdom Files books! Students use their Kingdom Files books to create trivia questions. Students should put one question and answer on each card (questions on one side, answers on the other). As an extension, students can turn this into a game by assigning point values to their cards. Very easy questions are worth one point while harder questions are worth two points. After students create their deck of task cards, let them pair up and quiz each other. If they play for points, students can keep score as they go!
